

Coronavirus Deep Clean

Town & Country Cleaning recently helped reopen a high-profile school using the very latest specialist technology (electrostatic-sprayer) and disinfectant chemical specifically designed to tackle the threat of coronavirus.

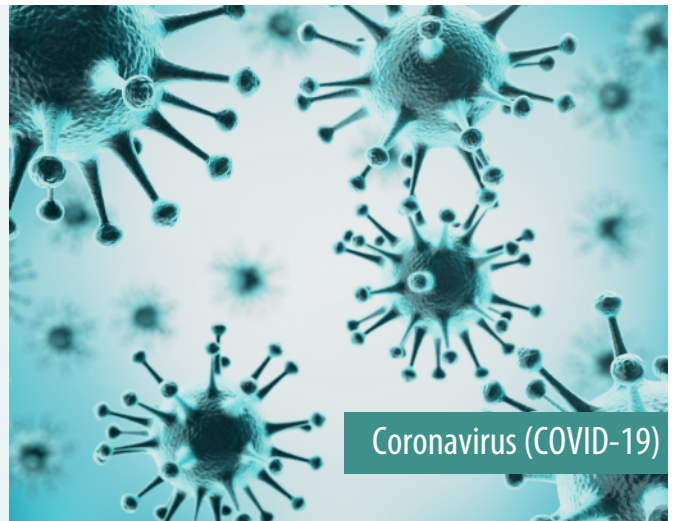

Tests have proven that in just a few hours, viruses can spread to 60% of a building's occupants from a single door handle.

Government information

Coronavirus (COVID-19) is a new strain of virus, first identified in China. Coronaviruses are common across the world. Typical symptoms of coronavirus include fever and a cough that may progress to a severe pneumonia causing shortness of breath and breathing difficulties.

Generally, coronavirus can cause more severe symptoms in people with weakened immune systems, older people, and those with long-term conditions like diabetes, cancer and chronic lung disease.

Coronavirus (COVID-19)

Containment & Prevention

Containment and prevention of passing on coronavirus is paramount, with the following general health advice:

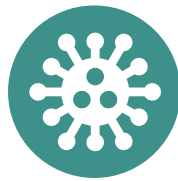

- Regularly wash hands (20-30 seconds per wash)
- Use hand sanitiser throughout premises including entry/exit
- Frequently use a personal hand sanitiser gel
- Promote "Catch it... Bin it... Kill it"
- Increase daytime housekeeping focused on hygiene cleaning on high-touch areas, e.g. handles, rails, surfaces etc
- For higher-risk environments, consider added personal protection including wearing a face mask (eg. 3M 9332 FFP3)
- Have a preventative contingency plan if the situation escalates, including using the very latest electrostatic-sprayer cleaning process in a "deep clean"

Cleaning Products (Prevention):

Cleaning solutions specifically recommended to reduce the threat of coronavirus include using products such as Selden Selgiene Extreme, Selden Selgiene Ultra, Selden Spray & Wipe, and strong bleach-based disinfectants that kill 99.9% of bacteria.

Using single-use j-cloths, bacterial cleaning wipes, single-use mop heads and disposable gloves will help reduce further risk of cross-contamination.

Town & Country Cleaning Coronavirus Deep Clean

As part of a hygiene plan, an organisation may need to commission a preventative contingency deep clean. Town & Country Cleaning can complete a coronavirus deep clean using the very latest electrostatic spraying technology that delivers precise application of disinfectants with x3 the coverage compared to traditional sprayers, wipes or cloths.

Our specialist clean comes with a 100% customer satisfaction guarantee.
